Dear Al, Ed, and Erik:

Just wanted to drop you a note expressing my sincere thanks for an outstanding conference. Your efforts in recruiting speakers was very evident -- one could not have assembled a more ideal group of individuals for the particular topic under discussion. In talking with other participants, it was obvious that everyone had the same impression, namely, that this was an outstanding symposium.

Special thanks to Erik for taking timeout to overview the GC/MS protocol for detection of lipid peroxides. We will explore the various alterations of methodologies, as suggested, immediately. Hopefully we can begin to generate some meaningful data utilizing this technique, which I believe should be viewed as the gold standard for this area of investigation.

In addition to the wealth of scientific information that I took in, I also had a great time participating in the various recreational activities offered during the symposium. Already I am thinking perhaps of driving through the Big Sky area sometime during the summer to see what things are like then. Thanks again for your efforts in making the conference a success, not only in terms of learning but also in terms of relaxation.

Please find enclosed the form relative to continuing medical education. I would like to thank you for an informative, interesting, and stimulating symposia -- look forward to following all of your work in the future. Should you decide to engage in another project of this type (a symposium on oxygen radicals) please let me know.

Sincerely,

Jerry J. Zimmerman, Ph.D./M.D., FCCM
